

the 13.447.02 light can be used with dimmer 14.482.00. The maximum capacity is 18W (1.5A based on 12V). So a dimmer can control about 7pcs of this light the most.

The connection is as below. Due to the LED is G4 type, both the two wires of light are white color. Just connect one to dimmer's white wire and one to power positive.
