

Adeprene Forte Nautic

Two-component polychloroprene adhesive for inflatable boats

Adeprene Forte nautic is an adhesive based on polychloroprene rubbers, two-component for bonding textile in Hypalon/Neoprene

DIRECTIONS FOR USE:

The parts to be bonded must be roughened

Add at the glue the 7/8% of activator and mix

Applying the first hand of glue mixture prepared

After 10 minutes applying the second hand

Wait 15/20 minutes, then to assemble the parts and press

The final bonding is completed after 72 hours

CHARACTERISTICS:

Colour	:	pale yellow
Smell	:	typical of the solvents contained
Solubility	:	soluble in aromatic hydrocarbons
Viscosity	:	1700/1900 m.Pas Brookfield at +20°C
Specific weight	:	0.900 Kg/Lt.
Solids content:		22+/-1%

WARNINGS AND SUGGESTIONS

Keep the original packed product in fresh and ventilated areas; too low temperatures (less than 0°C) will improve the viscosity, whereas too high temperatures (more than 30°C) can create an overpressure internally the container.

Do not breathe the vapours.

Do not swallow the product.

Avoid the contact with skin and eyes.

PACKING

Kit for reparation	20 pz.for cartoon
Cans	0,125 ml
Cans	0,410 Kg 48pz.for cartoon
Cans	0.850 Kg 24pz.for cartoon
Cans	16 Kg
Drums	170 Kg
